#### Map

Howard Health & Life Sciences High School is a total choice school, therefore they have no geographical district.

Students who choose Howard School of Health and Life Sciences are interested in a school dedicated to health-care, rigorous coursework, relevant classes that connect to real life healthcare professions, and a caring faculty committed to building strong relationships with student, staff members, parents, and community partners.

Our resources and endeavors support a healthcare educational environment that attracts and nurtures the best faculty and students. We believe that attitude is everything and are committed to excellence by providing the following:

- Focus on a rigorous curriculum relevant to a health-theme with a concentrated spotlight on careers in medical and life sciences
- Curriculum incorporated with community-based educational field trips
- Opportunity to earn college credits at post-secondary colleges or universities
- Flexible course scheduling with diverse learning opportunities
- Opportunity to develop enhanced informational technology skills
- Exposure to health-related work experience during freshmen year
- Health-related terminology integrated throughout all subjects
- Curriculum supported by Bloom's Taxonomy, Multiple Intelligence, and Project-based learning

Join us and become a part of our professional learning community.

Katrenna S. Rich, Ed. S., Principal
