What interests you about the Academy of Green Technology? _____

The Academy requires extra effort from time to time, but it also comes with privileges that others don't often get. There are field trips, guest speakers, lab and project-based classes, outreach, and scholarships for seniors. Many of our students are among the top academic students in their class and participate in athletics, band, SGA, etc. Participating in the Academy is fun, but it does require dedication, focus, and a team approach. If you are certain you wish to apply to the Academy and participate in our preview course, working toward sustainability, please acknowledge your interest below.
